Day - 2 [23/09/26]

function → set of instruction / set of code is already predefined is called function.

Three main components.
- → function name.
- → No. of Inputs.
- → Return value.

Name → Mounika.

1) function name → LOWER

Syntax → =LOWER(Mounika)

output → mounika.

2) function name → upper.

Syntax → =UPPER(Mounika).

output → MOUNIKA.

3) function name → Proper.

Syntax → PROPER(Mounika)

output → Mounika.

4) function Name → Len

Syntax → Len(Mounika)

output → 7.

5) function name → Left.

Syntax → Left(Mounika, 3). ← char.

output → MOU

6) function name → Right.

Syntax → Right(Mounika, 3).

output → ika.

7) function name → Mid.

Syntax → Mid(Mounika, 5, 2)

output → ik.

1st half.

function Name → Left, Len.

Syntax → LEFT (Mounika, LEN(Mounika)/2).

output → Moun.

2nd half.

function Name → Right, Len.

Syntax → Right (Mounika, LEN(Mounika)/2).

output → ika.
