DAY - 4 [28/09/26].

	A	B
Data	16	34

function name → In place of function we can use operators for, Add, SUB, MUL, DIV functions by using Absolute function.

Add → A+B → 50

Sub → A-B → -18

MUL → A*B → 544

DIV → A%B → ~~0.47~~ 5.44

→ In one column has multiple datas all datas shall multiply with 10 number for that we need to lock the 10 number containing cell.

function name → MUL

Syntax → = 16*$1$0

→ converting all datas into negative form [By multiply the data with (-1)]
